Project Title	Funding	Institution
VIP Family Meetings	$121,016	VIP Family Meetings
The Role of Shank3 in Neocortex Versus Striatum and the Pathophysiology of Autism	$25,000	Duke University
The genomic bridge project (GBP)	$158,206	Massachusetts General Hospital
Statistical methodology and analysis of the Simons Simplex Collection and related data	$80,389	University of Pennsylvania
Speech disorders in individuals with 16p11.2 deletion or duplication	$40,000	University of Wisconsin
Social processing, language, and executive functioning in twin pairs: Electrophysiological and behavioral endophenotypes	$0	University of Washington
Simons Variation in Individuals Project (VIP) Structural Imaging and Phenotyping Site - SCAP-local	$260,788	The Children's Hospital of Philadelphia
Simons Variation in Individuals Project (VIP) Statistical Core Site	$221,381	Columbia University
Simons Variation in Individuals Project (VIP) Site	$508,680	University of Washington
Simons Variation in Individuals Project (VIP) Site	$624,864	Boston Children's Hospital
Simons Variation in Individuals Project (VIP) Site	$316,306	Baylor College of Medicine
Simons Variation in Individuals Project (VIP) Recruitment Core and Phase 2 Coordination Site	$168,626	Geisinger Clinic, Weis Center for Research
Simons Variation in Individuals Project (VIP) Recruitment Coordination Site	$216,139	Weis Center for Research - Geisinger Clinc
Simons Variation in Individuals Project (VIP) Principal Investigator	$123,623	Columbia University
Simons Variation in Individuals Project (VIP) Imaging Analysis Site	$159,805	Harvard University
Simons Variation in Individuals Project (VIP) Functional Imaging Site	$1,142,798	University of California, San Francisco
Simons Variation in Individuals Project (VIP) Functional Imaging Site	$419,819	The Children's Hospital of Philadelphia
Simons Variation in Individuals Project (VIP) Core Neuroimaging Support Site	$434,182	University of California, San Francisco
Simons Variation in Individuals Project (Simons VIP) Functional Imaging Site and Structural Imaging/Phenotyping Site	$0	Children's Hospital of Philadelphia
Simons Variation in Individuals Project (Simons VIP)	$372,288	Emory University
Role of the 16p11.2 CNV in autism: genetic, cognitive and synaptic/circuit analyses	$0	Broad Institute, Inc.
Role of myelinating cells in autism spectrum disorders	$60,000	University of California, San Francisco
Relating copy number variants to head and brain size in neuropsychiatric disorders	$399,146	University of California, San Diego
Language processing in children with 22q11 deletion syndrome and autism	$0	Emory University
Identifying the gene in 17q12 responsible for neuropsychiatric phenotypes	$228,375	Geisinger Clinic
Identification of candidate genes at the synapse in autism spectrum disorders	$168,245	Yale University
Identification and Functional Analysis of Risk Genes for Autistic Macrocephaly	$0	Institute of Psychiatry/King's College London
High throughput sequencing of autism spectrum disorder (ASD) endophenotypes	$39,432	Baylor College of Medicine

Project Title	Funding	Institution
Genome-wide identification of variants affecting early human brain development	$590,292	University of North Carolina at Chapel Hill
Genetic investigations of motor stereotypies	$124,538	Yale University
Factors influencing early associative learning as a precursor to social behavior heterogeneity	$54,500	University of Southern California
Development of vision and attention in typical and ASD individuals	$305,682	Brown University
Developmental neurogenetics in adolescents with autism	$249,603	Yale University
Comprehensive phenotypic characterization of the 17q12 deletion syndrome	$125,000	Weis Center for Research - Geisinger Clinc
Children with 7q11.23 duplication syndrome: shared characteristics with autism	$250,000	University of Louisville
Characterizing the genetic systems of autism through multi-disease analysis	$503,306	Harvard Medical School
Characterization of infants and toddlers with the 16p copy-number variation	$149,372	Boston Children's Hospital
Biological determinants of brain variation in autism	$652,672	University of Wisconsin - Madison
Beta-catenin signaling in autism spectrum disorders	$60,100	University of Illinois at Chicago
Autism Linked LRRTM4-Heparan Sulphate Proteoglycan Complex Functions in Synapse Development	$0	University of Brtish Columbia
A system-level approach for discovery of phenotype specific genetic variation in ASD	$29,500	Hebrew University
Assessing the Cognitive Deficits Associated with 16p11.2 Deletion Syndrome	$59,734	Posit Science Corporation
Animal model of genetics and social behavior in autism spectrum disorders	$658,361	Duke University
A neuroimaging study of twin pairs with autism	$599,326	Stanford University
A gene-driven systems approach to identifying autism pathology	$249,874	University of California, San Francisco
A family-genetic study of language in autism	$308,419	Northwestern University
A collaborative translational autism research program for the military.	$966,000	Nationwide Children's Hospital
ACE Center: Neuroimaging signatures of autism: Linking brain function to genes and behavior	$178,857	University of California, Los Angeles
ACE Center: Genetic and genomic analyses to connect genes to brain to cognition in ASD	$241,951	University of California, Los Angeles
